The Foundations of Strategic Management in Government

Transition from Traditional to Strategic Approaches Historically, government agencies focused on inputs—budget, personnel, procedures—rather than outcomes. This inward-looking perspective often led to siloed operations and limited societal impact. The shift toward strategic management involves adopting a forward-looking, goal-oriented approach that aligns resources and activities with desired societal outcomes. Core elements include:

- **Vision and Mission Clarity:** Defining what society expects from government.
- **Goal Setting:** Establishing measurable objectives linked to public value.
- **Resource Alignment:** Ensuring

finances, personnel, and technology support strategic priorities. - Performance Measurement: Tracking progress and adjusting strategies accordingly. The Role of Strategic Management Frameworks Several frameworks support strategic management in the public sector, including: - The Balanced Scorecard: Adapts private sector tools to measure financial, customer, internal processes, and learning & growth perspectives. - Results-Based Management (RBM): Focuses on achieving specific results, emphasizing accountability. - Public Value Management (PVM): Integrates stakeholder engagement and societal outcomes into decision-making. --- Building a Public Value-Oriented Strategic Management Creating Public Value Strategic Management In Government 6 System Step 1: Engage Stakeholders and Define Public Needs Effective public value creation begins with understanding the needs and expectations of citizens, businesses, non-profit organizations, and other stakeholders. Step 5: Foster a Culture of Innovation and Learning Creating public value requires adaptability and innovation.
