an overarching ambiguity characterizes east asia today the region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes however a mixture of complex and often competing agents and processes has been knitting together various segments of east asia in remapping east asia t j pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in east asia have had a substantial cumulative effect on the broader canvas of international politics this collection is about the people processes and institutions behind that region building in it experts on the area take a broad approach to the dynamics and implications of regionalism instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of japan s leadership role in the region southeast asian business networks the war on terrorism in asia and the political economy of environmental regionalism throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly

council elections while the two koreas will be adjusting to the post kim jong il uncertainty japan too is still trying to recover from the triple disasters tsunami earthquakes and the radioactivity fallout with the current noda administration still trying to figure a way out to revitalize the japanese economy

from the founding of the ming dynasty in 1368 to the start of the opium wars in 1841 china has engaged in only two large scale conflicts with its principal neighbors korea vietnam and japan these four territorial and centralized states have otherwise fostered peaceful and long lasting relationships with one another and as they have grown more powerful the atmosphere around them has stabilized focusing on the role of the tribute system in maintaining stability in east asia and in fostering diplomatic and commercial exchange kang contrasts this history against the example of europe and the east asian states skirmishes with nomadic peoples to the north and west although china has been the unquestioned hegemon in the region with other political units always considered secondary the tributary order entailed military cultural and economic dimensions that afforded its participants immense latitude europe s westphalian system on the other hand was based on formal equality among states and balance of power politics resulting in incessant interstate conflict scholars tend to view europe s experience as universal but kang upends this tradition emphasizing east asia s formal hierarchy as an international system with its own history and character this approach not only recasts our understanding of east asian relations but also defines a model that applies to other hegemonies outside the european order
